- Joomla 1.5 Native
- W3C XHTML 1.0 Transitional. W3C CSS Valid
- Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package"

## eShoptrix II - Overview files

The first step to do is download all the files available on our exclusive MemberShip section and also some files that are available on our free section tools. Before we start the template installation, let's see a brief overview of the files available inside The eShoptrix II package release.

Since some tools used on this template have their own HelpFile, this Manual will give you the major orientation guide to make your installation. For further and details informations about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

### ! Sugestion!!!

We strongly recommend some regular visits to our [update.gavick.com](http://update.gavick.com) website, because it may be available some updates of the template and tools used on this project. Also, we invite you to visit our oficial blog on - [blog.gavick.com](http://blog.gavick.com) - where we, from time to time, give some usefull information and tips on how to customize or change some features of our templates and tools.

So, here's a brief overview of the files available inside the "eShoptrix II" Template pack release.

You downloaded the following two compressed files:

**gk\_eshoptrix\_2\_J!15.tgz**

This is the template file installation.

**gk\_eshoptrix\_2\_J!15\_rest\_files.zip**

### ! Important!

You must unpack the this file before doing anything - **gk\_eshoptrix\_2\_J!15\_rest\_files.zip** package.

After unpack you will find the following "gk\_eshoptrix\_2\_J!15\_rest\_files" folder witch contains the following files:

**\_doc!!!** "folder"

Here's the present Instructions Manual and also the PhotoSlide GK2 Component HelpFile.

**\_quickstart!!!** "folder"

The eShoptrix II package comes with a QuickStart package installation. If you are making a new Joomla installation, we strongly recommend this option, because this is the most easy way installation process! Includes all files needed to set exactly as we show in the demo"eShoptrix II"

**component** "folder"

This contains instructions on how to download ours free component - the PhotoSlide GK2.

Here's the present Instructions Manual.

## modules "folder"

Gavick VirtueMart Header Rotator (*mod\_gk2\_vm\_header.zip*) is the module that will display the products image slide on your webpage the group that will be set on PhotoSlide GK2 configuration.

Plugin Gk VM Header Rotator (*plg\_gk2\_vm\_header.zip*) this is the Gk VM header rotator plugin that must be installed using the PhotoSlide GK2 component administration.

Gavick VirtueMart Latest Product (*mod\_gk2\_vm\_lastprod.zip*) will show the latest products released on your VirtueMart store using a nice slide show panel with buttons navigation placed on the right side.

GK VirtueMart Category menu (*mod\_gk2\_vm\_category\_menu.zip*) show's with a nice effect, the main and sub-categories products of your VirtueMart store.

## source "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design. **Notice!!** The font type used on the source files are not provided with the Template package, because they may have copyrights reserved.

## VM "folder"

Here you can find the VM theme that we set for the eShoptrix II template. Starting from com\_virtuemart, you must upload this full files to ../components/.

This step is only necessary if you don't choose the QuickStart installation.

## ! Recommendation !!!

We strongly recommend the QuickStart installation, but if you need to install the eShoptrix II template on a existing website, doing step by step installation, first you must check if you have the latest Joomla!1.5 version and if not, please upgrade before any installation.

## eShoptrix II QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediatly to all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files needed. It will set your Joomla website exactly as we show eShoptrix II Template in our [demo.gavick.com](http://demo.gavick.com).

Again, we invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respective tools. So, keep in touch on [update.gavick.com](http://update.gavick.com).

### Sugestion!!!

Make use of this option and learn the environment of eShoptrix II template, by making some tests locally, using a local server like (i.e. **Wamp or Xampp Local Server**) or other available for free in the internet. This way, you be able to install, run and test easily all the potencial of this template.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

### Installation Steps for the QuickStart!!! version:

**Step 1)** Unpack the compressed file QUICKSTART-may2008.zip inside of the \_quickstart!!! folder and upload the content to your clean Joomla website directory folder installation. The files inside are similar to a normal Joomla!1.5 package.

**Step 2)** Create a new Database in your Website.

**Step 3)** Make a normal Joomla J!1.5 installation using the upload files. Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.

**Step 4)** After ending the installation, enter in the Administrator using Username "**admin**" and password "**demo**" (*Naturally, you can change this values after!!!*).

That's it! No more, no less. If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and others changes.

## eShoptrix II Quick Guide Manual Installation

For those who need to install the template manually and do not need further information, we present the following short cut step list for the eShoptrix II installation.

### ! Important recommendation!!!

Before starting the installation, please be sure to check if you have the latest Joomla! 1.5 version and if not, we strongly recommend that you upgrade your Joomla website.

**Step 1** - Install the eShoptrix II template (*gk\_eshoptrix\_2\_J15.tgz*), using the Joomla Installer.

**Step 2** - Go to the Templates Manager and set the “gk\_eshoptrix\_2” template to default.

**Step 3** - Using the Joomla Installer, install the Virtuemart 1.1.2 component (*com\_virtuemart\_1.1.2.j15.zip*).

**Step 4** - Using the Joomla Installer, install the following Virtuemart modules:

VM Login Form Module (*mod\_virtuemart\_login\_1.1.2.j15.zip*)

VM Currencies Module (*mod\_virtuemart\_currencies\_1.1.2.j15.zip*)

VM Shopping Cart Module (*mod\_virtuemart\_cart\_1.1.2.j15.zip*)

**Step 5** - Using the Joomla Installer, install the PhotoSlide Gk2 (*com\_gk2\_photoslide.zip*) component.

**Step 6** - Go to the PhotoSlide GK2 administration (do not use the Joomla installer!!!), select “plugins” menu and install the Plugin Gk VM header rotator (*plg\_gk2\_vm\_header.zip*). Don't forget to enable this plugin!!!

**Step 7** (Optional) - Go to the PhotoSlide GK2 administration, select “Extensions” menu and install the Rainbow Extension tool (*ext\_rainbow.zip*). Don't forget to enable this extension, if you want to use it.

**Step 8** - Go the Joomla Installer! and install the Gavick Virtuemart Header Rotator module (*mod\_gk2\_vm\_header.zip*). You now can start working by creating your slide groups on the PhotoSlide GK2 administration.

**Step 9** - Using the Joomla Installer, install the Gavick VirtueMart Latest Product (*mod\_gk2\_lastprod.zip*).

**Step 10** - Using the Joomla Installer, install the GK VirtueMart Category menu (*mod\_gk2\_vm\_category\_menu.zip*).

**Step 11** - With all previous 10 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

**! Notice!!!**

Please, take note that if you are installing our template and tools in a unclean Joomla website (with some 3th party components, modules or plugins), we cannot guarantee that all will work in perfect conditions. We can only guarantee the proper functioning of our tools or template functionality.

If you find any inconsistency with another script, use the forum support and if possible, we will try to find a solution, but without any compromise.

## Demo Modules Positions

The following screenshot contains a resume list of the modules used on the demo template and the respective positions:

#		Module Name	Position▲	Pages	Type	ID

## eShoptrix II template installation

Navigate to your Joomla! Administrator and enter in the administrative panel on your Joomla site.

From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the template file (*gk\_eshoptrix\_2\_J!15.tgz*) and press 'Upload File & Install.'

A message will appear saying 'Upload template - Success.'

This page will display an overview of the template, then select 'Continue...'

**Install Template Success**

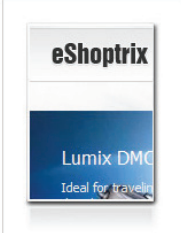

### eShoptrix II - May 08 Joomla Template (for Joomla 1.5)

Going beyond the traditional lead generation of eCommerce Templates and following the huge success received from the first eShoptrix Template, the GavickPro Team is proud to present the eShoptrix II Template for Joomla! 1.5. This fantastic template is mainly designed for use with Virtuemart 1.1.2 version, the most popular e-commerce solution for Joomla, giving a truly new meaning for your business presentation products. With perfect elegance and high top professional design, eShoptrix II is a perfect match for those who run an online retail business. eShoptrix II comes with the new and free version of Gavick PhotoSlide GK2 component that works with a specific module built for this template – the Gavick VirtueMart Header Rotator. Also using a specific new, interesting and useful modules based on the framework mootools: Gavick Virtuemart Last Products slide show, that will help you to present products in an eye-catching way and the perfect Gavick Virtuemart Category Menu, with sub categories display for easy and better navigation.

An overview of eShoptrix II key features:

- Tableless design and 100% css based
- 3 color variations (green - orange - blue)
- Build support for Virtuemart 1.1.2 Component.
- Build support for PhotoSlide GK2 component and the Gk2 VM Header Rotator module (specific for this template).
- Build support for Gk VM Last Products module (specific for this template).
- Build support for Gk VM Category Menu (specific for this template).
- Compressed engine option for each modules.
- Support for debug option.
- Support for language translation.
- 3 layout options: 2 columns (left + right+component), 2 columns (left or right + component) and 1 column (component).
- All 13 modules are fully collapsible.
- 2 Module variations built in.
- IE PNGFix Built In.
- Impressive built-in content style.
- Last Gavick Suckerfish menu version, with 2 built-in options - Suckerfish menu and Mootools.
- 34 different styles mootools animation effects.
- Speed menu animation option
- Optional IE6 Warning / Upgrade Notification
- Lightweight, modern and very fast-loading design
- Joomla 1.5 Native
- W3C XHTML 1.0 Transitional. W3C CSS Valid
- Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package"

[View eShoptrix II in live demo](#)

After the template is successful installed, you must set it as your default template. To do that, navigate to [Extensions](#) > [Template Manager](#) and set the "gk\_eshoptrix\_2" Template as default joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

# 6 Virtuemart 1.1.2 Installation files

The eShoptrix II use the most popular and complete ecommerce solution in Joomla CMS. The VirtueMart 1.1.2 stable version that is available for free downloading in the oficial website - <http://virtuemart.net>.

As your can see on the VirtueMart Package, besides the files used on this template, there's more modules and plugins available for use and they can be installed if they are needed for your interest.

Also there's an Instrution Manual file provide by the Authors of this great Component that can help you to understand and handling the full capacities of VirtueMart eCommerce Joomla Solution.

## Virtuemart 1.1.2 Component installation

Using the Joomla! Installer, from the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the Virtuemart 1.1.2 component file (*com\_virtuemart\_1.1.2.j15.zip*) and press 'Upload File & Install.'

A message will appear saying 'Upload template - Success.'

This page will display an overview of the component, then select 'Go directly to the shop' or if you choose, click "install SAMPLE DATA".

## Welcome to VirtueMart 1.1.2 stable !

VirtueMart 1.1.2 stable [Another Day]  
31/07/2008 20:00 GMT

**The first step of the Installation was SUCCESSFUL**

**Let's prepare the database now (the Installation Script hasn't found existing mambo-phpShop/VirtueMart Tables, so let's do a fresh installation).**

Basic Installation has been finished. You can use VirtueMart in a moment after having clicked on a link below.

To fill your Shop with dummy products, and to see how things can be set up, you can install some Sample Data now.

[Go directly to the Shop >>](#)

[Install SAMPLE DATA >>](#)

---

Go to [virtuemart.net](http://virtuemart.net) for further Help

Please consider a small donation to help me keep up the work on this component.

[Make a Donation](#)

## Virtuemart Modules Installation

Please note that the process is the same for each of the 3 VM modules selected for eShoptrix II Template.

So, using the Joomla installer, click the 'browse' button, select the respective module file inside the Modules folder and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

Do this steps for the following modules that you can find in *VirtueMart\_1.1.2-COMPLETE\_PACKAGE.j15* package..

### Virtuemart Login Form Module

*(mod\_virtuemart\_login\_1.1.2.j15.zip)*

This is the Virtuemart Login form module for Customer/User identification.

### Virtuemart Currencies Module

*(mod\_virtuemart\_currencies\_1.1.2.j15.zip)*

This module allows User to change automatically currencies for prices display.

### Virtuemart Shopping Cart Module

*(mod\_virtuemart\_cart\_1.1.2.j15.zip)*

This is the module that shows the content in products and values in the shopping cart for your client.

Now that you have all the Virtuemart 1.1.2 version files installed on the eShoptrix II, we advance to our tools installation.

category Flypage: gk flypage.tpl

See the screenshot example:

# Gavick eShoptrix II

## PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the \_doc! folder package.

You need to download this package from our free tools download section on [www.gavick.com](http://www.gavick.com) and then unpack first this file.

Using the Joomla Installer, search for the com\_gk2\_photoslide.zip and select “upload and install”

A message will appear saying ‘Upload Component - Success’ and it will show you an overview of the template. Then select “Continue”...

## Plugin Gk Virtuemart Header Rotator Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

The process installation of the plugin is exactly the same as stated on the HelpFile.

### Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator to install any plugin or extension available.

So, navigate to the PhotoSlide GK2 administration, select “plugins” option and choose “Install Plugin”. Then search the plg\_gk2\_vm\_header\_rotator.zip file locally and click “Save” on right menu.

If all goes well, you should be able to see the plugin successful installed, like the following screenshot indicates.

Groups   <b>Plugins</b>   Extensions   Check system   Help   Info   GavickPro News							
Plugin has been installed successfully							
#	ID	<input type="checkbox"/>	Status	Name	Description	Type	Version
1	1	<input type="checkbox"/>		GK VM Header Rotator	XML file for module Gavick VirtueMart Header rotator	module	2.0
Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules							

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

1	1	<input checked="" type="checkbox"/>	GK VM Header Rotator	XML file for module Gavick VirtueMart Header rotator	module	2.0

**Tip:** You must install plugin for each module which you want use on your site before create groups of slides for this modules

## Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let's see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk VM Header Rotator is no exception to this rule. So, select the "Groups" option and click on "Add Group" option. As we only have one plugin installed, this will be assume by default on the group creating process.

[GavickPro News](#)

**You have only one enabled plugin so this plugin was automatically selected for this new group**

Group name:	<input type="text"/>
Images quality (0-100):	<input type="text" value="75"/> %
Image width:	<input type="text"/> px
Image height:	<input type="text"/> px
Background color:	<input type="text" value="#000000"/>
Amount:	<input type="text"/>
Wordcount for short text:	<input type="text"/>
Wordcount for long text:	<input type="text"/>
Show title:	<input type="text" value="Yes"/>
Show text:	<input type="text" value="Yes"/>
Show price:	<input type="text" value="Yes"/>
Show link:	<input type="text" value="Yes"/>

### Group name:

For identification of the group, that will be necessary on the module configuration.

### Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most possible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

### Image width and height:

Set image width and height in pixels.

### Background color:

Color value in hex format for background (i.e. #FFFFFF).

### Amount:

The amount of images to be displayed on the first screen.

### Word count for short text:

The amount of words to display on short text description.

### Word count for long text:

The amount of words for long description text, to be displayed with hover mouse event effect.

### Show title | text | price | link:

Logical values for displayment on the product image slide.

Group name:	Demo Content - Hea
Images quality (0-100):	95 %
Image width:	326 px
Image height:	229 px
Background color:	#000000
Amount:	3
Wordcount for short text:	14
Wordcount for long text:	60
Show title:	Yes ▼
Show text:	Yes ▼
Show price:	Yes ▼
Show link:	Yes ▼

Example configuration used on the demo template group.

After all parameters are set, save it and the group is ready to receive slides.

## Adding Slides to Group configuration

Let's now see how to add slides to the group.

First, open the “Groups” panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the “Add slide” button and set the following parameters.

#### Preloading:

Set preloading option or not.

## Module advanced parameters:

### ! Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

### ! Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

### ! Use script:

In normal situations, option “automatic” is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

Parameters	
Module Parameters	
Advanced Parameters	
Clean template code	Enabled
Use MooTools	Automatic
Use script	Automatic
Use compressed engine	Enabled

### ! Use compressed engine:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionaly - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

Demo Screenshot

## Gk Virtuemart Last Products module installation

Using the Joomla! Installer, click the “browse” button and select the *mod\_gk2\_vm\_lastprod.zip* file, upload and install.

A message will appear saying “Upload Module - Success”.

This page will display an overview of the module, then select “Continue...”

# Gk Virtuemart Last Products module configuration

After successful module installation, from the Menu go to Extensions > Modules Manage and enter in panel configuration of the module. Set the module in the “top” position and enable it. Before you save it, you must configure the following parameters fields.

## Module parameters:

### Module Class Suffix:

Provides the possibility of set a css class that allow's individual module style. For this template, you should use -latestproduct for same demo style displayment.

### Module unique ID:

Unique ID for module (must be unique if you have two or more modules running on one page).

### Module Width:

Set module width in pixels (i.e. 682 - don't place px on the end).

### Number of loaded products:

This defines the number of products which will be loaded in the module. It should be equal result of multiplying - number of rows \* number of cols \* number of pages with products

### Show Product Price:

Defines wether the product price is displayed. If you have problems with efficiency then disable this option - it needs a lot of MySQL queries to work.

### Show Add-To-Cart:

Defines wether the button **ADD TO CART** is displayed or not.

### Show short product description:

Defines wether the description of product is displayed or not.

### Wordcount for short description:

Select the amount of words for short product description - i.e. 15.

### Rows:

Amount of rows displayment in table - for example: 2.

**Parameters**

**Module Parameters**

Module Class Suffix	-latestproduct
Module unique ID	vm-lp-1
Module width	682
Number of loaded products	12
Show Product Price	Enabled
Show Add-To-Cart	Enabled
Show short product description	Enabled
Wordcount for short description	15
Rows	2
Columns	3
Categories IDs	
Animation Speed	500

**Advanced Parameters**

### Columns:

Amount of columns displayment in table - for example: 3.

### Categories IDs:

Here you can set categories ID's, so that only products from this specified categories are displayed. You can leave blank if you want to display products from all categories. If you set it then separate by comma IDs - for example “1,2,3”

### Animation Speed:

Here you can specify speed of slide animation. Time in ms.

## Module advanced parameters:

**Parameters**

**Advanced Parameters**

Clean template code	Enabled
Use MooTools	Automatic
Use script	Automatic
Use compressed engine	Enabled

### ! Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

### ! Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

### ! Use script:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionally - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

## eShoptrix II Template parameters configuration

You can set the template parameters by selecting the gk\_eshoptrix\_2 template on Templates Manager. Press “edit” option and you be able to see the following parameters table.

### Color scheme:

Set here your default style scheme for the “eShoptrix II” template (green - orange - blue) options.

### Show advanced search:

Enable/disable the display of the advanced search on page.

### Menu type:

Select the main menu type to by use on the frontpage.

### Menu name:

Identify the ID of the menu for display.

### Menu speed:

Set speed menu animation.

### Menu animation:

Set type of menu animation transition effect.

### Menu width animation:

Use animation width in menu.

### Menu height animation:

Use animation height in menu.

### Menu opacity animation:

Enable/disable the use of opacity animation in menu.

### Style switcher:

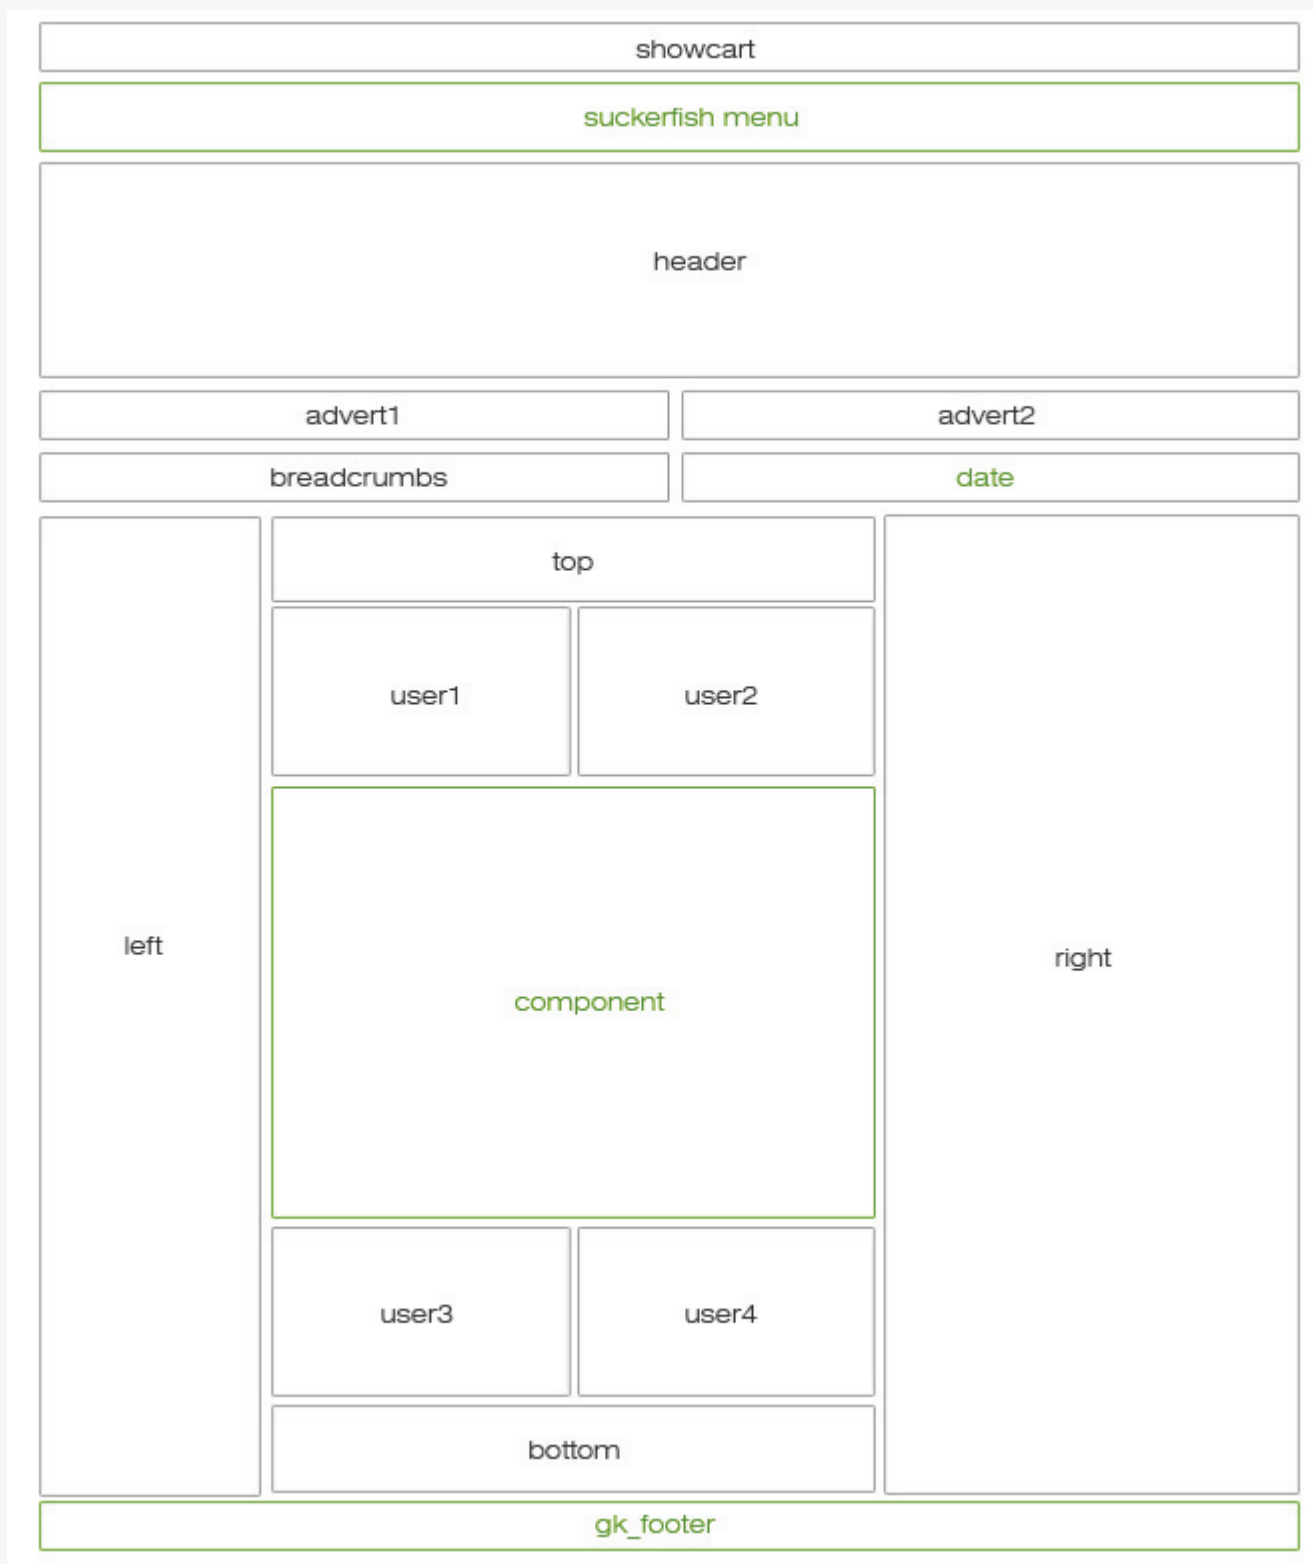

Enable/disable the bottom style switcher.

### IE6 alert:

Since we drop support for the old IE6 browser, you can enable this option to display a warning message to your website visitors, recommending the use of a different internet browser more current and secure.

# 10 Modules Positions

eShoptrix II fully supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right, left and the 'component' will fill the entire width.

## Green Style

This page presents most of typographical aspects of eShoptrix II template, using the green style scheme. Make your readers happy with great Typography and User Experience!
