---

MooMenu bglFrame	<input checked="" type="radio"/> No <input type="radio"/> Yes
MooMenu Delay	500
MooMenu Duration	600
MooMenu FPS	200
MooMenu Transition	Sine.easeOut ▾

### Default Style

The template is bundled with 5 pre-made style variants that be be easily and quickly chosen from the template configuration.

### IE6 Warning

Warn your visitors using Internet Explorer 6 to upgrade to a more secure version with this toggle. This option activates a javascript based dropdown in IE6 at the top of the template where a description of why IE6 is a redundant browser is visible. The warning will only appear once as its stored via a cookie.

### Font Family

You can choose which font you would like to use for your content item, these are all web standard fonts.

### Show Logo

MetaMorph allows you to turn the logo into a module position (icon) to allow for more flexible control.

## **Template Width**

This template configuration option allows you to easily change the width of the template itself, simply change the number to another pixel value.

## **Splitmenu Location**

One of the template's menu options is splitmenu which displays the first and second level items in the horizontal menu bar and the 3rd in a side column module. This option allows you to choose between the left or right column.

## **LeftColumn Width**

This template configuration option allows you to easily change the width of the left column, simply change the number to another pixel value.

## **RightColumn Width**

This template configuration option allows you to easily change the width of the right column, simply change the number to another pixel value.

## **Show Copyright**

MetaMorph allows you to turn the RocketTheme logo into a module position (footer) to allow for more flexible control.

## **Menu Name**

The following parameter controls which Joomla menu is loaded for the horizontal navigation bar, by default this is mainmenu but you can change it to whatever menu such as othermenu.

## **Menu Type**

MetaMorph is bundled with 4 menu options, 3 of which are integrated menu approaches. These are splitmenu, moomenu, suckerfish and module. Splitmenu displays the 1st menu items in the horizontal bar and the 2nd in the side column; moomenu and suckerfish display the menu items in dropdown lists with moomenu having a javascript powered approach; and the module options turns the menu bar into the toolbar module position so you can insert modules into the area (this will disable the menu however).

## **Default Font Size**

This option allows you to choose what the font size will be, you have 3 options to choose from, these are smaller, default and larger.

## **Show Pathway**

The pathway or breadcrumbs function can be disabled with this setting.

## **Show Bottom Logo**

This setting allows you to disable the bottom logo i.e. the second instance of the MetaMorph logo.

## **Show Controls**

This setting allows you to disable the text size controls in the upper right of the template.

## **Show Date**

This setting allows you to disable the date in the upper left of the template.

## **Show Module Slider**

This option allows you to enable or disable the Module slider that operates on the User11-User15 module positions.

## **Module Slider Location**

Choose whether the slider module appears in the left, middle or right column.

### **Module Slider Height**

Set the height value, in pixels, that the Module Slider will conform to.

### **Module Count**

The module configuration variable below controls how many consecutive modules you can have for a position.

### **Module List**

With the setting illustrated below, you can control the aspects of the integrated rokslide feature to a great extent. You can control the tab title and also the module position which appears in each of the tabs.

In the code snippet, we have 5 lines, each line controls a single tab. Each line is segregated into 2 distinct parts. These are "title"=>"Tab Title", which controls the Tab Title. The second part is "module"=>"Module Position"),
