

TerranTribune Basic Customisation

A guide to the basic TerranTribune customisation options that can be configured in the template "index.php" file with a description of each of the available options and how they affect the presentation of the template.

```
$default_color      = "blue";          // [any color] | none
$menu_colors        = "blue,red,purple,blue,green,orange,brown,grey"; // comma separated list of colors
$enable_ie6warn     = "true";          // true | false
$font_family        = "default"; // geneva | optima | helvetica | trebuchet | lucida | georgia | palatino
$show_fontbuttons    = "true";          // true | false
$template_width     = "962";            // width in px
$leftcolumn_width   = "320";            // width in px
$rightcolumn_width  = "320";            // width in px
$splitmenu_col      = "rightcol"; // leftcol | rightcol
$menu_name          = "mainmenu"; // mainmenu by default, can be any Joomla menu name
$menu_type          = "splitmenu"; // moomenu | suckerfish | splitmenu | module
$default_font       = "default"; // smaller | default | larger
$show_pathway       = "false";          // true | false
$show_logo          = "true";           // true | false
$show_date          = "true";           // true | false
$show_copyright     = "true";           // true | false
```

Default Color

TerranTribune has 8 selectable colour options for the horizontal menu bar. Simply change the settings between the two " " tags to your style of choice.

```
$default_color = "blue"; // [any color] | none
```

Menu Color

Warn your visitors using Internet Explorer 6 to upgrade to a more secure version with this toggle.

```
$menu_colors = "blue,red,purple,blue,green,orange,brown,grey"; // comma seperated list of colors
```

IE6 Warning

Warn your visitors using Internet Explorer 6 to upgrade to a more secure version with this toggle.

```
$enable_ie6warn = "true"; // true | false
```

Font Family

You can choose which font you would like to use for your titles.

```
$font_family = "default"; // geneva | optima | helvetica | trebuchet | lucida | georgia | palatino
```

Show Logo

With the following setting enabled, you can have the logo as a module position (icon).

```
$show_logo = "true"; // true | false
```

Font Buttons

You can enable or disable the font sizer buttons that will display at the top of the template.

```
$show_fontbuttons = "true"; // true | false
```

Template Width

You have the ability to select the width of the template. The setting is what you edit to either reduce or increase templates width.

```
$template_width = "962"; // width in px
```

Splitmenu Location

With the template setting, you can control which side the splitmenu is allocated

```
$splitmenu_col = "rightcol"; // leftcol | rig
```

Show Date

The template has a styled date module which will display the current date (day, date and month). The setting below controls whether it is active.

```
$show_date = "true"; // true | false
```

LeftColumn Width

With the template setting, you can choose the width of the left column.

```
$leftcolumn_width = "160"; // width in px
```

RightColumn Width

With the template setting, you can choose the width of the right column.

```
$rightcolumn_width = "320"; // width in px
```

Show Copyright

This setting allows you to change the copyright text and RocketTheme logo at the bottom of the template to the module position: footer.

```
$show_copyright = "true"; // true | false
```

Menu Name

The template parameter controls which Joomla! menu is loaded for the horizontal navigation bar. Therefore, you can create your own custom menu to load independent from any menu module on your site. The possibilities are endless.

```
$menu_name = "mainmenu"; // mainmenu by default
```

Menu Type

TerranTribune has the 4 options for the horizontal navigation bar. You can either, select moomenu, the latest menu addition; suckerfish, the basic vertical dropdown menu; splitmenu, the popular classic or have the area as a separate module position.

```
$menu_type = "moomenu"; // moomenu | suckerfish | splitmenu | module
```

Default Font Size

Based on your own personal preference or the preference of your users; you can easily set the default font size of the text in your site by editing the following line:

```
$default_font = "default"; // smaller | default | larger
```

Show Pathway

Sometimes sites just look better with no pathway, and we've provided a convenient toggle to allow you to disable this for your site

```
$show_pathway = "false"; // true | false
```
